Hille-Chalkline Case Settled in the Courts

The case of A. V. E. Chalkline vs. H. O. Hille, both farmers of the Cereal district, was tried in Hanna on Wednesday and Thursday of last week. The action was for damages to the plaintiff's car and also for personal damages to his hand caused when the two cars collided on the highway near Cereal. The plaintiff's car was going north on the highway and the defendant's car was coming south, following two other cars. The defendant was behind the car of one Smith, and when endeavoring to pass Smith's car he first became aware that Chalkline's car was approaching to meet him. Not having sufficient time as he thought to dodge back behind Smith's car Hille made for the ditch, but not in time to prevent the accident. Hille sought to set up that an agreement had been made before action brought that if he repaired the car thoroughly that Chalkline would call it square. This was denied by the other side. Some questions were put to the jury at the close of the case by His Lordship, and, after being out a considerable time, the jury answered that no settlement had been made, that the defendant had been negligent and that his negligence had caused the accident, and that there had been no contributory negligence on the part of the plaintiff, and that they found damages to the following extent: In respect of the car, which had cost \$334 to repair, the said sum of \$334 and \$100 in addition, and for personal injuries \$500, whereupon Judge Ives gave judgment in favor of the plaintiff for \$934, with a credit of \$334, which had already been paid by the defendant for repairs of plaintiff's car with costs of the action to the plaintiff.

Judge Ives Quotes two Maxims to Sutherland

In the trial of Bill Sutherland on Monday of last week in Hanna, Judge Ives, after examining the witnesses, said that the Crown had proved up to the hilt the robbery by Kelly, and also that the accused's Ford car had been used by Kelly to escape, but that the Crown had not sufficient evidence to show that, after the robbery and at the time of escape, Sutherland knew of the robbery having been committed. He also said there were suspicious circumstances, but these were not sufficient to allow the case to go to the jury. In discharging Sutherland, His Lordship quoted to him the maxims: "You are known by the company you keep" and "Evil communications corrupt good manners".

Agricultural Society Meeting

The annual meeting of the Chinook and District Agricultural Society will be held in the Agricultural Hall on Saturday, December 7, at 3 p.m. HORACE DUNSTER, Secretary-Treasurer.

Swedish mothers put money into their children's first bath to bring them future wealth.

Curling Club Held an Enthusiastic Meeting

The Chinook Curling Club held its second general meeting for the season on Wednesday evening. A very large representation of enthusiastic curling members were present. All indications point to having one of the best seasons the Club has yet experienced.

Ten selected skips will meet on Thursday evening to arrange their rinks, and, as flooding arrangements were made on October 8, curling will commence immediately.

Fees for the season were set at \$10 for town members and \$5 for country members.

The skips are S. H. Smith, W. Milligan, W. A. Todd, L. S. Dawson, M. L. Chapman, E. E. Jacques, W. A. Hurley, H. W. Butts, W. S. Lee, R. D. Vanhook.

Those present were S. H. Smith, W. S. Lee, W. Milligan, T. Nordin, W. A. Todd, L. S. Dawson, N. Murray, L. Robinson, P. Begon, N. F. Marcy, O. Nelson, R. D. Vanhook, A. V. Youell, E. C. Pfeiffer, L. Brownell, C. J. Bennett, C. Flater, J. Gingles, C. E. Neff, W. S. Korek, E. Evans, M. L. Chapman, W. A. Hurley, E. E. Jacques, W. Meade, R. A. Morrison, J. G. Connell, J. Renie.

Chinook W.I.

The Women's Institute met on Wednesday afternoon at the home of Mrs. J. Massey. Mrs. R. Stewart and Mrs. Massey were hostesses.

The meeting opened in the usual manner, 14 members being present. The December meeting, being the last for 1929, it was necessary to elect officers for the ensuing year. Mrs. Jacques, the retiring president, has held office for two years and declined to accept another nomination. The following officers were elected: President—Mrs. W. S. Lee, Vice-President—Mrs. Wright Lawrence.

Secretary-Treasurer—Mrs. M. L. Chapman.

Directors—Mrs. J. Massey, Mrs. J. G. Connell, Mrs. A. V. Youell.

Little Peggy Lawrence presented the retiring president with a bouquet.

C.G.I.T. Group

The above organization met in the play room of the Acadia Hotel on Monday evening. A lengthy discussion on India was the leading feature of the program. Plans were laid for presenting a tableaux at the Christmas entertainment. Games were played.

This is the first time the girls have met in the new play room or on a Monday evening. Heretofore their meetings have been held in the school house Thursday evenings.

Mohawk Trail Rangers

The above organization met in the play room of the Acadia Hotel on Thursday evening of last week. Added to the transaction of regular routine business and play, five members were taken into the order by initiation. This brings the membership up to about 14. For a young organization the boys are getting along fine under the leadership of Rev. J. D. Woollett. They meet every Thursday evening.

Here is a Store Full of Splendid Christmas Gifts

BANKING ON NON-PROFIT BASIS IS PLAN OF FARMERS

Saskatoon, Sask.—Co-operative banking on a non-profit basis is being set up as the next step in monetary reform by an inter-provincial farm organization committee which concluded sessions here.

The committee members were representatives of farm organizations in Manitoba, Alberta, and Saskatchewan. John Arnott, of Regina, Man., A. F. Aitken, of Moryton, Alta., and George F. Stirling, of Saskatoon, Sask. The meeting was held in the central offices of the United Farmers of Canada, Saskatchewan section here.

The object of the conference was to lay the foundation for co-ordination of educational work of the three farm organizations of the prairie provinces regarding monetary reform.

A summary of reports from students of monetary reform holding different views were read, after which the committee considered three different viewpoints of procedure:

1. To seek to amend the present banking system.
 2. To ignore the present system and concentrate on the establishment of an entirely different system.
 3. To seek by amendments to get what benefits possible from the present system through the development of co-operative banking, at the same time keeping in view the changing of the present monetary system so that consumption of goods can keep pace with the fullest possible production.
- The committee was of the opinion that the latter suggestion should be the basis of educational work.

Rolled Oats Mills Complain

Say Competition From United States Is Affecting Business Here

Calgary.—Rolled oats mills in Western Canada which invariably at this time of year have been running 24 hours a day, are closed down or are operating on part time as a result of the flooding of the Canadian market with rolled oats manufactured in the United States. Mills in Calgary, Moose Jaw, Winnipeg and Saskatoon are thus affected.

It is not a matter of dumping; so Canadian mills state; it is a matter of competition. Oats are so much lower in price in the States that the American millers can manufacture rolled oats, pay the duty of 60 cents per 80-pound barrel, pay the freight and handling charges, and then undersell the Canadian millers.

The latter have submitted the matter to the federal government at Ottawa, but have been informed that nothing can be done until after parliament meets.

Royal Winter Fair

Toronto Show One Of The Most Successful Ever Held

Toronto.—The close of the Royal Winter Fair concluded one of the most successful affairs in the history of the exposition.

Ontario held premier place in the events of closing day. An impressive display of prize winning livestock, floats loaded with produce from the farms and the presence of the scarlet uniformed dragoons gave a final burst of color to the fair.

From the points of view of attendance and receipts, high quality of exhibits, particularly in livestock, this fair has never been excelled, said Duncan O. Bull, Brampton, president.

Racing Against Time

Quebec, Que.—Paul Paquin and Dick Lesage, trans-Canada canoeists, who left Vancouver on May 1, hope to complete their long voyage to Halifax, N.S., before the rivers through which they must travel freeze up, and are proceeding as fast as possible to their destination.

Deporting Unruly Men

Toronto.—Regarded as unfit for work on Canadian farms on account of conditions, a number of unemployed men who migrated from Great Britain and who have been creating a problem for local immigration officials, will be deported.

First Airplane Theft

Kansas City, Mo.—Highwaymen of the airlines have appeared here. Two armed men bound and gagged a servicing attendant and flew away in Bart Stephenson's maroon and yellow plane, fueled and ready for a 500-mile flight.

North Carolina is establishing a Hall of Fame of historic trees.

W. N. U. 1511

Clue To Whereabouts Of Missing Aviators

New Search Will Be Started For Eielson and Borland

New York.—A new search by land and air will be under way for Carl Ben Eielson and Earl Borland, who are lost somewhere in the ice field surrounding North Cape, Siberia.

Officials of the Aviation Corporation announced they had received the first definite clue to Eielson's whereabouts since he pushed his plane into a blizzard on Nov. 9, while flying to the rescue of the ice-locked ship Nanuk.

Graham B. Grosvenor received the following telegram from Frank Dorland, of Alaska Airways Inc., a subsidiary of the Aviation Corporation, at Teller, Alaska:

"Another dog team arrived from Ketchikan and reported seeing smoke in the foothills 30 miles from North Cape. No natives in that district. Probably Eielson. Unfavorable weather and shortage of dog teams made immediate search impossible. Returning to search. Russian plane leaving from Providence Bay to seek Eielson."

Honors Were Divided

Saskatchewan and Manitoba Win With Clydesdales At Royal Fair

Toronto.—Saskatchewan and Manitoba kept the west to the forefront in the Clydesdale classes at the Royal Agricultural Show, each province winning a championship for stallions. The exhibitors from these two provinces won many other awards. University of Saskatchewan being awarded among other wins, first and fourth for three get-of-sire and two animals progeny of dam. It was Manitoba Day at the Fair, and the province celebrated the occasion in appropriate fashion.

Manitoba's great triumph was the victory of Arnprior Emigrant, the stallion which was awarded the Carleisle and Walker Horse trophy, the finest trophy offered at Canadian exhibitions for best Clydesdale stallion in the show. This is the second time that this horse, owned by the Reston Horse Syndicate, has won the trophy and the fourth time in the eight years that it has been competed for that it has gone to Manitoba. Saskatchewan has won it three times and Ontario once.

Had Miraculous Escape

Shipwrecked Mariner Turns Up Alive After Hope Had Been Abandoned

London, England.—A Maltese fireman named Attard, supposed to have been drowned when the steamer Molesey was wrecked with the loss of eight lives in a gale two days ago, created a sensation in a hotel at Milford Haven by a sudden appearance. He had remained secluded aboard the wreck until calmer water permitted him to scramble to shore over the great Milford Rock, which rises steeply from the water. His feat was considered a record one.

By chance a retired naval officer in a motor boat spotted Attard on the rock and took him off stiff with cold and almost exhausted.

Congratulations For Minister Of Finance

Hon. C. Dunning Receives Messages From All Over Dominion

Ottawa, Ont.—Hon. Charles Dunning, Western Canada's first Minister of Finance, has been deluged by a flood of congratulatory messages.

These messages came not only from the West but from every province of the Dominion. The first message he received was from an old friend in Halifax. The early hours this morning brought scores of telegrams from Quebec, Montreal, Toronto, Winnipeg, Regina, Saskatoon, Calgary, Edmonton and Vancouver. There were, in addition, innumerable messages from country points in Saskatchewan.

Two Killed In Railway Crash

Vancouver, B.C.—D. O. Watkins, of Jasper, engineer on an extra east-bound freight and fireman E. C. F. Bragg, of Edmonton, on a westbound fast freight of the Canadian National Railway, lost their lives as the result of a head-on collision four miles west of Jasper. Two other members of the train crews suffered minor injuries.

Air Mail Popular

Saskatoon, Sask.—Indicative of the widespread interest in the new prairie air mail service, 5,000 letters have been received at the post office here for delivery on the first planes to leave this city. The letters are from all parts of Canada, the United States, the British Isles and one packet is from the Bahamas.

Railway Earnings Less

Small Movement Of Wheat This Year Reflected In Reduced Revenues

Truro, N.S.—S. J. Hungerford, vice-president of the Canadian National Railway, who is here on a tour of inspection, said that "the wheat situation this year will seriously affect the earnings of railways in Canada. The movement of wheat this year does not exceed 25 per cent. of the movement to this time last year." Mr. Hungerford said, adding that the future of the situation was problematical.

Because elevator space throughout the West and at the head of the Great Lakes is well filled with storage wheat, Mr. Hungerford did not think there would be any considerable shipments for some time. A feature of the 1929 grain transportation, he said, was the movement west via Vancouver. Fully 20 per cent. more wheat has left the country by that route than for the corresponding period in 1928, thus decreasing the tonnage shipped via Atlantic ports of Portland, Me.; Boston, St. John and Halifax.

HUGE VOLUME OF GRAIN HANDLED BY WHEAT POOL

Winnipeg, Man.—Total handling of 253,102,585 bushels of wheat and 35,694,057 bushels of coarse grains is reported by the Canadian Wheat Pool in the annual report of the board of directors, issued here.

The gross turnover for the year amounted to \$288,077,011, a reduction from the previous year of \$35,000,000, largely accounted for in the carry-over of wheat which on August 31, 1929, amounted to 48,358,585 bushels.

Sales of wheat over the marketing period under review—1928-29—the report states, have been remarkably regular in view of the extreme conditions of the world's markets which had to be contended with. The carry-over was a result of the superabundance of supplies which could not be placed into consumption channels without demoralizing the world markets.

Deliveries to country elevators or over platforms in the western inspection division during the year ending July 31 last, were 475,711,628 bushels of wheat, of which 244,248,200 bushels were delivered to the Pool, or 51.3 per cent. of the total crop.

Dealing with the export trade the report shows that the Canadian pool shipped to 90 ports in 19 countries, a total of 108,140,608 bushels, the largest shipment being to the United Kingdom, 34,694,881 bushels.

No announcement of the final payment has yet been made, the report says, in view of the large carry-over on hand from last year. This is the first year that there has been such a carry-over. The only alternative was to have sold the crop at a price level that would have made the investment attractive to the speculator. Such an operation would, the report states, have an effect on new crop price levels which would be disastrous.

"The year as a whole has been one of many perplexities and grave anxieties," says the report. "The system upon which pool operations are based has, however, withstood every strain placed upon it so far, and has never functioned with more efficiency than in the past year of surplus supplies."

BRITISH AMBASSADOR

Sir Ronald Lindsay, permanent under-secretary of state for foreign affairs and chief of the English foreign office, who is named as new ambassador for Britain at Washington, succeeding Sir Esme Howard. Copyright, 1929, Pacific and Atlantic Photos, Inc.

Sees Good Market In Asia

Canada Interested In Prospect Of Increased Exports From U.S.

Washington.—"The greatest potential market in the world," Asia, with its billion inhabitants will not be overlooked in the programs for the stimulation of foreign trade to be inaugurated by the Department of Commerce as part of President Hoover's plan for stabilizing business in the United States. The prospect of increased flow of exports from the United States to China and Japan is interesting from the Canadian viewpoint because commodities such as flour, lumber and autos are shipped through the British Columbia ports.

Great Britain, it is pointed out, has been in the Orient for a hundred years and thereby reaps great profit. A Canadian sidelight on the situation is the report from Ottawa of the proposal to establish steamship services from Eastern Canadian ports to India and British East Africa.

Alberta Old Age Pensions

1,188 Persons In Province Enjoying The Benefits Of Scheme

Edmonton.—When the checks from the Alberta Old Age Pension Board are distributed for the month of November, 1,188 persons will be included on the permanent roll of pensioners and for the four months during which the scheme has been in operation, nearly \$80,000 will have been disbursed among the aged in the province.

At the end of October only 853 persons were enjoying the benefits of the pension scheme but during the past month, 335 permanent pensioners have been added to the rapidly increasing number. The board officers are dealing with an average of 100 applications every week and it is being found that the tendency is one of steady increase rather than abatement.

Canadian Flying Club Formed

Montreal.—The Aero Club of Canada has been formed here as result of a meeting of the Hangar Club of Montreal, vien Col. J. Scott-Williams was elected president. The purpose of the club is to promote interest in flying throughout Canada and to furnish a meeting place for all the officers of the Air Service and for those directly connected with aviation.

PROVINCIAL SWINE CLUB WINNERS, 1929

Winners of the Canadian Pacific Swine Club Competitions, photographed prior to their departure for Toronto, where they attended the Royal Winter Fair as guests of the Railway. They are shown above, with their respective provincial trophies and medals. Sitting, left to right: Bert Curry and Vance, Manitoba winners; George Thornton and Robert Hume, Saskatchewan winners; standing, Hugh McLeod and Harry Naylor, British Columbia winners; William Doughnass and Arthur Kriesse, the Alberta winners.

Deny Prison Plot Story

Statement Is Made That Nothing Is Wrong With Saskatchewan Penitentiary

Prince Albert, Sask.—"There is absolutely nothing wrong at the Saskatchewan penitentiary, nor has there been any trouble. We are not attempting to hide anything from the public. I give you my word of honor that all the many rumors concerning the penitentiary which have been circulated have no basis in fact."

This was the emphatic denial made by E. B. Jackson, Ottawa, inspector of penitentiaries in answer to a statement that an attempt to burn down the penitentiary had been frustrated in the nick of time; that wardens had found a pile of oil-soaked rubbish in a portion of the building which would easily take fire.

"Since I came here about a week ago, I have gone thoroughly into the matter. I found absolutely nothing to indicate a jail break was being plotted. There was no attack upon jail guards, as one rumor held. There was nothing in a way to arouse any suspicion that trouble was brewing here."

Mr. Jackson has no conception of how the report was circulated. As a matter of fact he says the building could not be burned as it is constructed of concrete and steel.

Britain Prepared To Help Settle Trouble

Willing To Join In Attempt To Settle Russo-Chinese Dispute

London, England.—Great Britain is prepared to participate with other powers in joint action to bring the Russo-Chinese dispute in Manchuria to a successful termination if such action proves possible.

Mr. Arthur Henderson, foreign secretary, made this reply to a questioner in the House of Commons. He said he would consider whether Great Britain should take the initiative with the other powers.

Mr. Henderson told Sir Austen Chamberlain, his Conservative predecessor at the foreign office, that communications had passed between the United States and British governments with reference to the possibility of joint action in Manchuria. The question had been discussed in the early days of the year.

"I think that since then no further communication has been received, but I think a communication has come through a telegram from another government, and if joint action can be taken we are prepared to participate."

NEW PLANES ARE PURCHASED FOR AIR MAIL SERVICE

Vancouver.—Purchase by Western Canada Airways, Limited, of six combined mail-passenger planes for use on the Winnipeg-Vancouver air mail service has been announced here.

Three of the mail planes, which are required for immediate delivery, will be built in Seattle, while the others will be built in Vancouver.

The type of plane selected by W. L. Brimble, operations manager of Western Canada Airways, in Winnipeg, has a cabin for four passengers and a mail capacity of 500 pounds. Planes of this type have been flown over the Chicago-San Francisco air mail routes in the United States for the past two years.

All planes will be equipped for night flying, as it will be necessary for Western Canada Airways pilots to do a large portion of the route at night. A full day will be cut from the trans-continental mail schedule by the service which will start about the middle of December, mail taken off the train at Winnipeg overtaking at Banff the train which left the east 24 hours earlier.

Between Winnipeg and Calgary, the planes will fly by way of Regina, Moose Jaw and Medicine Hat, while between Winnipeg and Edmonton they will go by way of Saskatoon. Fields with night flying beacons and landing lights are being installed near Medicine Hat, Alderson, Brooks, Bassano, Namanda and Calgary.

The planes are powered with 525 horsepower engines, have a high speed of 120 miles per hour and cruise at 115 miles per hour fully loaded. They have a landing speed of 57 miles per hour and climb 800 feet per minute to a service ceiling of 15,100 feet. They carry 140 gallons of gasoline and 30,000 average letters in addition to four passengers.

Post office officials report that Canmore-Vancouver air mail route is now under way, the intention being to open this division during the summer of 1930.

BRITAIN MUST STUDY OVERSEAS TRADE QUESTION

London, England.—The outstanding weakness in British marketing operations overseas is a detached insular attitude and unsentimental practice, according to the report of a committee on the education of salesmen appointed by the late Conservative Government. This condition, the committee finds, is a relic of the time long past when Great Britain enjoyed a virtual monopoly of the world's markets for manufactured goods.

While this committee was investigating the Port of London authorities instituted its own investigation.

The Morning Post in a leading editorial calls attention to a letter received by the port authority from F. MacCure-Sanders, commissioner of the board of trade of St. John, N.B. "We do not have enough sailings to and from here to London," Commissioner Sanders writes: "Perhaps shipping interests in London are not fully conscious of the importance of the ever growing importance of Canada's ocean traffic."

"So far there has been little personal touch between the Old Country and Canada. When your manufacturers send representatives they rarely send the right type of man to impress the right people. If you people want this market you must go after it. You must be prepared to pay the price. Such a price would prove a wonderful investment and the present moment is probably better than any in the past."

Millions For Good Roads

Saskatchewan Government Proposes Six Main Highways In Province

Regina.—Saskatchewan's government will spend \$5,000,000 to improve highways of the province, according to a prediction made by Hon. C. A. Stewart, Minister of Highways.

Through this expenditure six main trunk highways would be completed with all-weather surfaces within a few years, according to Mr. Stewart.

At the same time Hon. J. A. Merkle, provincial secretary, told of plans to make a \$5 cut on every motor vehicle license issued in the province with all 1930.

Reduction of motor licenses would amount to \$600,000, as about 120,000 motor vehicles are now in use in the province. At the same time this figure represents an increase of about 10,000 vehicles over last year's total. The government is, however, deriving an increase in the gasoline tax to five cents. This jump from the present import of three cents per gallon would mean additional revenue for the province of possibly \$1,000,000.

No Cause For Worry

Proposal Regarding Canadian Workers In U.S. Not Bothering Ottawa

Ottawa.—The proposal to compel native and non-native Canadians to live in United States while working in that country does not excite any degree of apprehension here. Those closely in touch with the situation point out that such proposals have been broached several times the last few years, but the attitude of the United States Department of Labor has been consistently against any so stringent regulation.

It was explained here that non-native Canadians can only work in U.S. under quota provisions at present and native Canadians are compelled to pay head tax.

Opening Of Parliament

Indications Would Point To Opening On January 30th

Ottawa.—Preparations for the coming session of parliament are proceeding. As indicated by Premier Mackenzie King, it is the desire to have the session open in good shape so that there will be little delay after the members reach Ottawa.

Departmental estimates are being prepared and reviewed and the cabinet has given consideration to some of the matters which it is proposed to bring up.

Indications now point to the opening of parliament on Thursday, January 30, or a week later.

B.C. May Exhibit Poultry

Vancouver.—Representatives of the B.C. Poultry Industry at a meeting here expressed their willingness to prepare an exhibit of 250 birds for the great poultry exhibition to be held in London, England, next July. The exhibit would represent this province's contribution to the Dominion Government's proposed exhibit of one thousand birds.

The Common Cold

Responsible For Greater Loss Of Time From School Or Work Than Any Other Cause

The writer quotes a doctor who was asked, "How do you treat colds, doctor?" and replied, "With contempt, madam, with contempt." But can they be treated with contempt? Common colds are responsible for a greater loss of time from school and work than any other single cause. They frequently lead to pneumonia, and pneumonia, in 1923, caused more deaths in Canada and the United States than any other disease except heart disease. With the average worker, colds take more money out of his pocket every year than any other disease.

Common colds are caught in two ways—from other people, and from our own method of living.

The cold that we "catch" from other people hits us when the germ that causes it enters the nose and throat passages of the victim from the air which an infected person talks, coughs or sneezes. By using an unwashed tumbler, fork or spoon which has been previously used by someone with a cold, by handling something that has been used by an infected person—these things will give you a cold.

The cold that we "catch" even though no one around has one, is usually the result of wearing too little or too much clothing, having poor circulation or some local infection of the throat or nose, or submitting one's self to rapid changes of temperature.

A minimum of damage would be done with colds if everyone were willing to take a rest of a week or ten days immediately they become afflicted with a cold.

Just as soon as your head becomes "stuffed up" or you have other signs of a cold like soreness of the throat, discharging nose, you should start a campaign against the cold. The first day or two are the important ones.

The first thing to do is to go to bed, or at least stay indoors. If you feel weak, that may be a sign of influenza coming on; and particularly in that case you would be well advised to get under covers. A laxative should be taken. At night take a hot bath and as soon as you have rubbed yourself thoroughly dry, get into bed again taking the very best of care that you do not catch a chill. It is well after a hot bath to put several dry blankets on the bed, so that you may do what is commonly known as "sweating the cold out of your system." This will be aided by a hot drink.

It is a serious mistake to blow one's nose too hard, because many people have caused the infection from a cold to spread to other parts of the head, like the ears.

There are many dangers which arise from a common cold. The first of these is influenza, because it in turn, is apt to lead to many other serious impairments. Pneumonia, tuberculosis, heart trouble, nose and throat affections, rheumatism, sinus trouble all have their origin in the "flu" on occasions. Many people who are deaf have lost their hearing through a common cold.

There are a number of things which we can do to prevent colds. I will give you a list of them.

(1) If your tonsils are diseased or your teeth are bad, or you have adenoids, they should be removed. (2) Brush your teeth twice a day, because teeth which are diseased are frequently found to be at the root of chronic colds.

(3) Avoid getting your feet wet. Some people who have the interests of their health at heart keep an extra pair of shoes and stockings at their place of work. Then, if they get caught out without their rubbers, they can change. It is courting trouble to spend the whole day with wet feet.

(4) Do not allow yourself to become run down. Get plenty of sleep, exercise regularly, drink plenty of water and eat nourishing, health building food.

(5) Keep the windows open. This applies to winter and summer. Every-

one should sleep in a room where the air is fresh.

(6) Watch the thermometer. Rooms that are overheated are the cause of more colds than rooms that are under-heated. If the place where you work is not as well-ventilated as it should be, and there is nothing you can do to ameliorate conditions, take a few minutes off now and then to go outside and fill your lungs with fresh air.

(7) Avoid drastic changes of temperature. If you have been perspiring, allow yourself to cool off gradually. It is foolish to sit in the breeze or in front of an electric fan.

(8) Stay away from infected people. When there is an epidemic, avoid crowds.

(9) Wash your hands frequently, certainly before eating.

(10) Wear clothing that helps you to avoid colds. In this country it is best to put on extra clothing when you are going out into the cold rather than wear heavy cloth such as thick underwear when you are in your office or home.

Frequency Of Milking Cows

Experiment Would Indicate That Milking Three Times A Day Is Profitable

Whether it is more profitable to milk cows twice or three times a day would seem to depend on the quantity of milk the cows are capable of giving. To determine the effect of the number of milkings on milk and butter fat production an experiment was carried on for some time at the Experimental Station at Ste. Anne de la Pocatiere, Quebec, operated by the Department of Agriculture, at Ottawa.

Two lots of three cows each, similar with regard to condition and dairy capacity, receiving the same feeds and giving an average of forty pounds of milk per day, were used in this test. The only difference between the two lots was the cows in one lot were milked twice a day, and in the other lot three times a day.

It was found at the end of the test that those milked three times a day gave 14 per cent. more milk and 22 per cent. more butter fat than those which were milked twice a day.

The Great Columbia Icefield

Area Of 110 Square Miles Of Ice and Snow

The great Columbia icefield in the Canadian Rockies contains approximately an area of 110 square miles of ice and snow and lies at a mean altitude of from 9,500 to 10,000 feet above sea level. It discharges about twenty alpine glaciers, many presenting beautiful icefalls. These form the headwaters of the Columbia, Saskatchewan, and Athabasca Rivers, flowing respectively to the Pacific, Atlantic, and Arctic oceans. This remarkable icefield is shown on sheets 21, 22 and 23, of the map of the inter-provincial boundary between Alberta and British Columbia, published by the Topographical Survey, Department of the Interior, Ottawa.

In Banff Zoo

Interesting Collection Of Wild Animals At Mountain Resort

Pat, a polar bear from Herschel Island, in Mackenzie Bay, is an object of special interest to every child who visits the Government zoo at Banff. In Banff National Park, Alberta, Pat's cage is always a centre of attraction at feeding time. In the large well-kept cages in the zoo, in a most interesting collection of wild animals, including specimens of the black, brown, and grizzly bear, lynx, marten, wolverine, coyote, wolf, and other animals. Near the zoo is the Government museum which contains an excellent collection of big game and smaller animals, as well as of the bird, fish, and plant life of the region. Indian relics and examples of Indian handicraft, including some very fine embroideries, are also shown.

Prince Has Good Memory

Lt.-Col. C. W. Peck, V.C., one of the Canadian guests at the Prince of Wales' Armistice Day dinner to the V.C.'s of the Empire, commented on the remarkable memory of the Prince of Wales. "I had quite a long talk with him," he said, "and all the time he was inquiring about various members of my brigade. His knowledge of them, when one considers the number of brigades he came in touch with, amazed me."

Manitoba Fisheries

The Manitoba Co-operative Fisheries Limited, an organization of 400 fishermen on Lake Winnipeg, which began activities September 1, 1928, is handling 6,100,000 pounds of fish in its first season, (ending April 30th), out of a total catch in Lake Winnipeg of 14,500,000 pounds.

A windmill at Sussex, England, that is 200 years old, has been converted into a tea room.

A Romantic Career

Henry Berka, now maître d'hôtel at the Lord Nelson Hotel, Halifax, and late head waiter at the Chateau Frontenac, Quebec, is a Bohemian by birth, and at the beginning of the Great War was interested with some thousands of other Czechs of military age then in England. But he and his fellow countrymen were only too anxious to come in on the side of the Allies. He was given the chance and was one of the first to join the British colors. He rose to non-commissioned rank in the famous Royal Fusiliers and saw two years of fighting, receiving many decorations. He was gassed in 1918 and so did not share the triumph of the Czech legions that marched into Prague after the Austrian Empire had crumbled. Now, instead of fighting men, he feeds them and of the two occupations infinitely prefers the latter.

Business Conditions Good

Trade Throughout Canada Exceptionally Good For This Time Of Year

Business conditions throughout Canada are exceptionally good for this season of the year, according to J. H. Woods, president of the Canadian Chamber of Commerce, who is touring British Columbia, accompanied by W. M. Clarke, of Montreal, secretary, conferring with Boards of Trade, following a similar itinerary of trade bodies in the Maritime Provinces. The Maritimes, he said, are making a remarkable recovery from the recent depression.

Vacuum Cleaner Agent—Can I sell you a really good machine? Business Man—Come back on Thursday.

Vacuum Cleaner Agent—Sorry, but I'll be out of town on Thursday. Business Man—So will I.

See Evangeline Land

No less than 15,787 tourists visited Grand Pre Memorial Park, Nova Scotia, during the 1928 summer season. The park is the property of the Dominion Atlantic Railway which acquired it before the war years and made of it a beautiful pleasure ground. Evangeline, the heroine of Longfellow's epic of the Acadians, Evangeline's Well, in its original state, forms one of the chief attractions of the park, and the National Acadian Society erected a memorial church on the property. A beautiful statue of Evangeline, the heroine of Longfellow's epic of the Acadians, Evangeline's Well, in its original state, forms one of the chief attractions of the park, and the National Acadian Society erected a memorial church on the property. A beautiful statue of Evangeline, the heroine of Longfellow's epic of the Acadians, Evangeline's Well, in its original state, forms one of the chief attractions of the park, and the National Acadian Society erected a memorial church on the property.

Boiled Potatoes In Poultry Ration

Better Gains and Larger Profits When Potatoes Included In Feed

Cockleberries being finished for the market, and fed on cooked potatoes as a part of the ration, made better gains and gave larger profits than other lots receiving no potatoes. Various grain mixtures were used such as barley meal, oatmeal, bran and cornmeal mixed with milk at the rate of one and one-half pound per pound of grain.

The lot that made the greatest profit received a mixture of cornmeal two parts, oatmeal two parts, bran one part, cooked potatoes one part, all mixed in a mash with milk. This lot made a gain in weight of 9.5 pounds while other pens receiving a mash without the potatoes made a gain of from three to four pounds less. The most profitable ration contained beet scrap in the place of milk. The mash in this case was made up of two parts each of cornmeal, oatmeal and beet scrap and one part bran.

Further details of this experiment appear in the report of the superintendent of the Ste. Anne de la Pocatiere Station for last year, published by the Department of Agriculture, at Ottawa, who states that these results confirm the results shown by a similar experiment the previous year.

Geodetic Work In Manitoba

Establishment Of Interprovincial Boundary Line Between Manitoba and Ontario

This past season, the Geodetic Survey of Canada sent a party to the east end of Island Lake, in northern Manitoba, to make a precise determination of the astronomical latitude and longitude in connection with the establishment of the interprovincial boundary between Ontario and Manitoba. The aeroplane once more proved its value as a means of transportation in country difficult of access by other means, and sixteen hundred miles were flown during the season carrying out this part of the program of the Geodetic Survey.

Streets Of Jewels

It sounds like a fairy tale, but Professor Otto Quele, of the Bonn University is responsible for the statement that emeralds, diamonds, rubies, sapphires, and other precious stones, are literally paved with amethysts—the waste product in cutting the gems, and that there is a place in Siberia where opals are used for road material.

Motorists in Buenos Aires are compelled by authorities to keep their cars free from mud.

Ethel Alderson, sprightly young dancing star of Philip Rodway's English Pantomime Company, which returns to the Grand Theatre, Regina, for three days, commencing Thursday, December 6th, in "Mother Goose." Also Walker Theatre, Winnipeg, for week commencing December 9.

Using 'Planes For

Disinfecting Forests

Experiment To Be Continued In B.C. Next Year

Airplanes were used this summer to spray calcium arsenate and lime over a stretch of forest infested with the injurious tree pest, the Hemlock looper. So far as it has been possible to test the results of this treatment, results are promising, and foresters claim the experiment may mark an important step in the eradication of forest parasites from the air.

The experiments will be continued and specially constructed equipment will be provided for the 'planes to be employed next year, replacing the improvised hoppers that were utilized during the past season.

The fact, that until recently, the great Douglas fir belt has been comparatively free from damaging insects, made the discovery of the Hemlock looper in the forests on the north arm of Burrard Inlet, near Vancouver, exceptionally important and alarming. Forest experts were consulted, with the result that an immediate campaign of combating the looper larvae was got under way, this taking the form of airplane dusting.

For several days 'planes manoeuvred over the forest spraying the poisonous powder much in the manner of war 'planes spreading a smoke screen or gas. Allowance had to be made for the atmospheric conditions and the drift of the wind, so that the powder might have the maximum effect.

Forest officials state that while it may take some time to determine the effect of the campaign, enough evidence of dead looper larvae, which are a species of caterpillars, was found to indicate success.

Animals That Have Trades

Civil Engineers, Architects and Electricians Are Some Of Them

You wouldn't think animals followed trades, but there are certain of them who have a trade at their nannies, so to speak.

Bees are geometers. The cells are so constructed as with the least quantity of material to have the largest spaces and least possible loss of interstices. The mole is meteorologist. The torpedo, the ray, and the electric eel are electricians. The turtle is a navigator; he raises and lowers his sails, casts and weighs anchor, and performs other nautical acts.

Whole tribes of birds are musicians. The beaver is an architect, builder, and woodcutter; he cuts down trees and erects houses and dams. The marmot is a civil engineer; he not only builds houses, but constructs aqueducts and drains to keep them dry.

The white ants maintain a regular army of soldiers. Wasps are paper manufacturers. Caterpillars are silk spinners. The squirrel is a ferryman; with a chip or a piece of bark for a boat and his tail for a sail he crosses the stream.

Ontario Hydro Power Lines

More than 1,400 miles of new hydro power lines in rural Ontario have been constructed this year, in addition to the 4,000 miles already in operation. The new lines, the Hydro Commission announces, will serve 6,700 consumers.

Ancient tablets recently unearthed in Egypt are the grocery accounts of Egyptian households.

World demand for snakeskins have caused a shortage in Borneo.

India is practically a soapless country.

Will Always Be Mystery

Doctors Admit They Do Not Know Why Heart Beats

Your heart beats because it is alive. It beats 72 times a minute, which represents about 38,000,000 times a year, or 2,000 million times in a life of 50 years.

The heart is a hollow muscular pump which opens and shuts with a regular rhythm. It contracts on the blood within it, in order to drive that blood onward through the whole body, for the blood carries the indispensable oxygen to every part of our frame. The heart has to contract on this blood with force, for the resistance of all the tubular blood-vessels is considerable.

It beats continually but not continuously, for it rests a short time between each beat. When we calculate how long the heart rests, and how long it works a day, we find that the figures are as 14 of rest to 10 of work.

The human heart, like that of all mammals and birds, is a double organ. Each heart has two cavities, between which are found the most delicate and expensively-fitting valves which permit a flow in one direction only. The heart on the right side deals exclusively with blue blood that has come from the veins and is being sent to the lungs. The heart on the left deals with scarlet blood which it has received from the lungs and is sending to the body. The blood goes from the right to the left by way of the lungs.

The energy developed by the heart is greater than one would suppose. Being a force-pump, the left heart has to drive the blood, as we have seen, against considerable resistance. It has been computed that the heart beats 100 times a minute, and that two days enough energy to raise a thousand men one foot, or one man a thousand feet.

The human heart is neither the swiftest nor slowest type. The frog's beats only about half as fast; whereas the rate of the dog's heart is about 100 a minute. In warm-blooded animals, the larger the animal the slower the pulse. In the new-born child the pulse is about twice as fast as in the adult.

We do not really know why the heart beats. If we knew that, we should know a great deal about the secret of life itself. What starts it is a mystery; what stops it is another.

It is not the presence of blood in it, because the heart was beating long before any blood was formed in it. A heart will beat after all its nerves have been cut.

All we can say is that the muscle of the heart possesses the mysterious power of contracting at a rhythm of its own. We do not understand what made the beats begin.

Old Engine Superannuated

Ponderous Machine Used Since 1835 Has Been Discontinued

An old hauling engine at Seaham Docks, once used for drawing wagons by a wire rope up an incline, has been dismantled. The engine was of the beam type and on the beam is the date of 1835. The docks were begun in 1828 and tradition says that before being set up at Seaham the engine had duty at a colliery in the west of the country. It worked regularly up to the war period. Very ponderous in character, the engine had a fly wheel 20 feet in diameter and a large upright cylinder.

Rockets To Start 'Planes

Experiments in starting airplanes and aeroplanes with rockets, are said to be proving successful in Germany. The rockets will not propel the 'planes except at the take-off, after which the regular power will be used. The rocket auxiliary propulsion is intended to reduce the run before the take-off, and to aid the 'planes to rise, regardless of the load.

Turks who are unable to pay an exemption tax are conscripted and enrolled in labor battalions.

"Ah, Emil, at last we are engaged." "Yes, darling, and shall remain so always."—Hummel, Hamburg.

"I never experienced such emotions as at the hotel where I spent my wedding night." "Of course not." "Yes, we stole the sheets, the bedspread, and the water bottle, and left without paying."—Pages Gales, Yverdon.

Proposal That Food Ships In War Time Shall Have Freedom Of Seas, Is Strong Peace Gesture

President Hoover's proposal that ships shall have the freedom of the seas in war time, clashes directly with the master strategy of war. That is why, no doubt, the President puts it forward only as a suggestion, something to be implanted in the public mind at a time when the main trend of thought is running against war.

It is a preposterous measure, this utterance of Mr. Hoover's; it accords with his plea for concentration of thought and energy upon preparedness for peace. For while statesmen and citizenry are striving to devise means to settle controversies that might lead to war, science is steadily at work on means to make war more horrible. Not that the scientists are war makers. But that they respond naturally to the age-old urge of the war psychosis.

Starvation has always been one of war's weapons. Only since its all-enveloping possibilities as developed in the World War have become so apparent to mankind the horrors of a whole people especially of women and children, evoked abhorrence in the peace time that succeeds war. Science may devise greater and greater weapons of war; strategy may counsel the winning of victory by involvement of a whole people in the enormity of it. But the Twentieth Century has made war so all-inclusive that the weapon of starvation, tolerable when its siege was relatively limited to scope, must soon, if it does not now, command a new place in the view of humanity. For, instead of making war more horrible, this advance would make it less effective, and so less the resort of nations.

It is with this trend in mind, no doubt, that the President implants the idea in the American mind. He recognizes, as well, that ideas must first germinate, if they are to take root and thrive. He distinctly says this proposal of free food ships will not be injected into the London Naval Conference. For the furtherance of agreement at that conference, he reiterates his principles of naval reduction by agreement; he pleads the cause of international conference to avoid war; he pledges his endeavor to maintain the defensive excellence of the Nation's military and naval arms; and he bespeaks the need for taking every means toward understanding among people.

The most salient point in his Armistice Day address—his solution of the problem of freedom of the seas—he offers for further study. It may well prove to be his greatest contribution to preparedness for peace.—Minneapolis Journal.

Weather Moves In Cycles

Has Not Changed In 30,000 Years
Opinion Of Scientists

The weather not only is no different from what it was a generation ago, but it's just the same as it was 30,000 years ago, it was said at the American Academy of Science conference in Princeton, N.J. Drs. Chester A. Reed and Ernst Anton, of the American Museum of Natural history, by examining clay deposits in New England, found that the weather then—as it does now, they added—moved in cycles of from three to five years each of cool and warm years.

In spite of the recent inventions of the gyroscope compass, the sun compass, the radio compass, and other direction finders, the magnetic compass is today more widely employed than ever before.

Judge: "What brought you here?"
Accused: "Two policemen."
Judge: "I don't mean that—drunk, I presume."
Accused: "Both of them."

"You are an hour late, Meier. Where have you been?"
"I fell down the stairs."
"Nonsense! That does not take an hour."—Lustige Kolner Zeitung, Cologne.

W. N. U. 1814

SITTING PRETTY

He is a Hindu Fakir in India, and to prove that he is leading a life of ascetic, not to mention severe discomfort, he has been seated on this bed of ten-inch spikes, for the last ten years or so. No doubt he gets up now and again and stretches himself, but in the main he remains seated. Without having exactly an air of stricken joy on his face, he is not looking too downhearted. This is one of the amazing sights that are seen by round-the-world tourists on the Canadian Pacific Steamships cruise that starts out from New York next month.

New Method Of Meat Storage

New Zealand Will Make Shipments Ready For Oven

New Zealand is trying a method of meat storage which is expected to bring about a change in the butcher shops in America, and eventually in the world. Beef and mutton will be cut into steaks, chops, roasts and other pieces, before refrigeration and shipment to this country. All superfluous fat and bone will be trimmed away, and each piece covered in strong transparent wrapping. When the housewife receives it, it will be ready for the oven or pan.

A fig that tastes like an apple has been produced. Just what is wrong with a fig that tastes like a fig is not stated.

Among Asiatics it is still a popular belief that earthquakes are due to the skippings and breathings of a huge frog.

An Agricultural Turkey

Only Small Portion Of Turkey Is Under Cultivation

With a population of over 15,000,000 inhabitants, and an area of 230,822 square miles, Turkey is essentially an agricultural country. It is estimated that if 40 per cent. of her area is capable of being cultivated scarcely 12 per cent is under cultivation. Among the principal agricultural products are fruit, tobacco, cereals, cotton and olives. To the above sources of agricultural wealth must be added the income derived from cattle and goats, which contributes annually in wool, hides, and skins, mohair and casings for exports a sum not less than \$20,000,000. The wool is employed in the making of the famous Turkish carpets, blankets, rugs, fine cloth, and in the manufacture of hosiery.

Tibet is a country without an automobile.

FASHION

EMBROIDERED ARTICLES EVER

11078—Pattern contains a flower basket 15 inches wide by 23 inches high, four corner designs 11 inches long on either outer edge, and two sprays 4 1/2 inches by 18 inches. This design used on bedspread will make a very acceptable Christmas gift (blue).
11116—Pattern provides bedspread motif measuring 22 by 28 inches wide, also two smaller motifs. These motifs may be applied to corners of spread. This design carried out in any desired color scheme will make a very pretty bedspread for one of your friends for Christmas (blue).

11143—Pattern contains two ship designs, measuring about 12 1/2 inches wide and 6 1/2 inches high, including the water line; also two motifs for trimming household linens measuring about 7 1/2 inches wide and 3 inches high. Ship design is developed in cross-stitch and is suitable for dainty pillow, which will solve the problem of a Christmas gift for some friend. Two remaining motifs can be carried out in outline and running stitch with dots of French knots (blue).

11103—Pattern provides fourteen complete old English script alphabets. Three alphabets of each

POPULAR CHRISTMAS GIFTS

style of letter are half an inch high, three alphabets of each style one inch high, and one alphabet of each style two inches high. These letters can be used on various Christmas gifts such as handkerchiefs, underwear, guest towels, luncheon and tea sets, bed-linen, etc. (blue).
All patterns 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Problem of Juvenile Delinquency Should Receive Serious Attention Of The People Of Canada

A thought that should make us pause and consider for a while the problem of juvenile delinquency, is the recent statement of a police officer that fully sixty per cent. of the crime committed in the average large city, is the work of boys under twenty-one years of age.

It is a fascinating study to try to determine from whence the criminal classes spring. Almost invariably an investigation shows that in every large city the criminals grow up with it. Occasionally we allow an American "bad man" or a crook from other countries to slip through our gates, but the majority of our criminals are the former "bad boys" of the neighborhood, who won that title through carelessness of the parents in bringing them up, and who develop from the "bad boy" stage to the hoodlum, the street corner loafer, and from that point, still without restraint to the skilled crook, who is determined to be an enemy of society and an aristocrat of the underworld.

Experience has taught criminologists that it is not the boy of from twelve to fifteen years of age, who stays by his own fireside in the evenings, who develops into the dangerous character. It is the boy who is allowed by his parents to wander the streets at all hours of the night.

An incident which police officials in Toronto encountered recently, illustrates how far matters can go when there is laxity in the home. They had occasion to confine a small boy, fifteen years of age, whose two brothers were both in the penitentiary. When the police called at the house to get the boy, they were stopped at the door by his little sister, nine years of age who had the temerity and the experience to resist their entry, contending that they couldn't enter the house without a warrant.

The explanation as to why this home and thousands of others turn out this type of citizen instead of the kind of man or woman of whom we might be proud, can be summed up in three words—"lack of discipline."

The tendency to coddle children, to let them have their own way too much, to permit them to run wild in the streets, because they might be too much trouble in the house, is to be blamed for the fact that the upkeep of penal institutions forms a large portion of our taxes.

There is inclined to be too much sentimentality in connection with dealing with our unruly children. This discussion should not, for one minute, be construed as an out-and-out support of the maxim, "Spare the rod and spoil the child." Many of us do not and it is necessary to discipline our children by punishment, and we gratefully accept the opportunity of avoiding this disagreeable task. But when a boy shows signs of being incorrigible along certain lines, drastic action is going to make a difference in his future life, we should not be so weak that we coddle our children to their own undoing.

Respect for their elders should be a cardinal rule with the children in every home. Nothing may influence a boy's life more than developing the habit of saying "yes sir" or "no ma'am" and to get the idea in their heads that the elders are apt to know more than they do.

Just to show you the predominance of youth in crime statistics, I would like to quote the following figures, which are worked on the basis of the 1921 census, when it was calculated that there were 3,456,600 males in Canada.

Of the juvenile from 10 to 16 years of age, 1 in every 87 is a criminal.
Of the youths from 16 to 20 years old, 1 in every 75 is a criminal.
Of the men from 20 to 40 years of age, 1 in every 106 is a criminal.
Of the men from 40 to 100 years of age, 1 in every 245 is a criminal.
If we take pains to teach our children that:

- (1)—Laws are made for their protection and that consequently they should respect them.
- (2)—That a clean mind, sound body and good character, with the desire and ability to work, are God's greatest gift to humanity.
- (3)—That honesty is the best policy, and the way of the transgressor is the road to ruin.
- (4)—That Canada has greater opportunities to offer them for the future than any other place on earth, if they develop knowledge and wisdom and grow up to respect the laws of God and man.
- (5)—That we, their elders, are their protectors and friends, and that they must come to us when they are in trouble, danger, or in need of advice.

We will be doing our duties as parents and will be helping our sons and

daughters to grow up into fine Canadians, which there is no finer specimen in the world.

Makes Tour Of World

Corn Cob Pipe Started Journey From Prince Rupert Some Years Ago

It's only a "barnyard meerschaum" in other words a battered corn cob pipe, but it has seen the world and is en route home with labels, poems and newspaper clippings to prove it. The globe-trotting corn cob reached Canadian National head offices at Montreal from England, on the last leg of its journey around the world. Some years ago a baggage agent of the Canadian National Railway at Prince Rupert, B.C., started the old corn cob pipe on its world tour with a tag attached asking the recipient to forward it in turn to a Canadian National agent in Australia. Since then the pipe has travelled. Australia, New Zealand, Hong Kong, and England, were a few of the countries of call, most of the agents at points visited attaching a message in the form of newspaper clippings, poem, or photograph representative of his territory. Now the pipe, which was the original shipment, is almost lost in the hundreds of others that have come to Montreal. It returns to Prince Rupert, to the man who started it on its globe trotting tour.

Time Is Important Factor

Less Interest Lost On Gold Carried By Air

Gold is a good sailor, but an even better traveller in the air. For gold that flies loses less interest than gold carried slowly on a ship. All of which makes it certain, say bankers in this world banking centre, that whoever first succeeds in establishing regular aeroplanes service across the Atlantic will draw a big revenue from international shipments of gold.
The flight of gold from London to Paris in the past month or two, for instance, has been literal as well as figurative. Practically all of the billion sent to France has gone by air. In one week more than 40 tons were carried across the channel by plane.
Not all flying gold is in the form of bullion, of course. Some of it is in the form of coins. But usually bar gold is used, each bar weighing about 25 pounds and worth about \$8,500. The bars are packed in little iron-bound chests, each holding about four bars.

When there is a \$5,000,000 shipment to be flown across the channel the actual weight which the 'planes must carry is about eight tons. Such a large shipment usually goes by special plane, but smaller consignments often go as casually as ordinary merchandise, the boxes sometimes being stowed under passengers' seats.
An important factor is the time saved by air travel. Interest on several millions is nothing to be sniffed at. On a shipment of \$10,000,000 for instance, about \$8,000 in interest would be saved if the Atlantic passage could be shortened by four days.

Power Commissions In Canada

In Manitoba, Ontario, New Brunswick, and Nova Scotia, commissions under the Government have been formed to develop or purchase power and to transmit and distribute electric energy. The greatest development in this field has been in Ontario through the Hydro-Electric Power Commission formed in 1906.

"Heavens, man, why didn't you blow your horn when you saw that man in front of you?"
"What was the use? I thought it would be more merciful if he didn't know what hit him."

"Why didn't you keep the secret I told you?"
"Why didn't you keep it yourself?"

He: Before I propose, may I ask if you have anything in the bank?"
She: "Yes, I have a fancy who is cashier there, and we are to be married next month."—En Relig. Hall, Timma, Gothenborg.

WORLD HAPPENINGS
BRIEFLY TOLD

Quarterly returns indicated that Great Britain's births would exceed deaths by considerably less than 200,000 this year compared with 400,000 in 1920.

The U.S. National Geographic Society has announced it has granted an additional \$25,000 to Commander Richard E. Byrd for his Antarctic expedition. The society already had granted \$25,000.

An international conference looking toward the regulation of operation of trawlers in the fishing industry off the Canadian coast may be called at Ottawa next year, the Department of Commerce, at Washington, is informed.

Allotment of millions of dollars for construction of new cruisers and submarines will be considered by the U.S. House Appropriations Committee in January, regardless of the naval limitation conference beginning in London, England, that month.

Former Governor Alfred E. Smith, of New York, has revealed that the new Empire State building which his company is to erect on the site of the old Waldorf-Astoria hotel, will tower 85 stories into the air, thus soaring higher than any other structure in the world.

Brazil has agreed to accept a large percentage of the German-Russian refugees, some of whom are already in Germany, while others are awaiting opportunity to leave Russia. The peasants will be given refuge in Southern Brazil, where there are a number of German settlements.

Among the candidates whose names have come before the committee which will award the Nobel Peace prize is that of Frank B. Kellogg, former United States secretary of state and co-worker with Foreign Minister Briand in bringing about the famous Kellogg-Briand renunciation of war pact.

The council of the Chinese government has addressed an appeal both to the League of Nations and to individual signatories of the Kellogg-Briand peace pact to take steps to halt and punish the Russia Soviet "invasion" of Chinese territory. The invasion was termed a deliberate violation of the anti-war pact.

Build Cottages For Britshers

Canadian National Railways Has Plan To Help New Settlers

The problem of housing British immigrant families come to Canada to settle on the land is being met, to some extent at least, by the offer of the Canadian National Railways to build cottages for the Britshers at various points on the prairies so that the new arrivals may secure a home at a nominal rent of three dollars a month. This offer has been approved by the Overseas Settlement Board of the British Government.

British people, forming the bulk of the immigrant tide into Canada, often suffer because they are unprepared to cope with the conditions in the farming districts of the Dominion, which are so different from those prevailing in the Old Country. On the other hand, immigrants from Europe, especially the northern parts of Europe, are accustomed, even before they embark for the voyage overseas, to the solitude and rigours of a life where settlement has left much of the countryside untouched.

The cottages to be built by the Canadian National in the three prairie provinces will stand on a fenced plot of land averaging from one half to one acre in extent. They will be served by good roads and as near as possible to the local market place and school. They will be furnished with stoves and simple furniture.

It is understood that the families will occupy the cottages only during their first year in Canada, while they are obtaining preliminary experience in farming conditions.

There is a good deal in what a great philosopher has said, "The most utterly lost of all days is that in which you have not laughed."

"Why are you in the street in pajamas?"
Professor: "Wait a minute and let me guess."—Luistige Sachen, Leipzig.

W. N. U. 1814

Awaiting Deportation

One Hundred Men From British Isles Are Stranded In Toronto

Upward of 100 men brought out to Canada from the British Isles during the summer to work on farms throughout the Dominion are waiting to be deported, the Toronto Telegram says. A good many of them are complaining that they are now without food and without lodging, and are wondering how they are going to live until they get work, or until the Ontario and Dominion governments decide to deport them.

These men were brought to Canada by the St. George Society of Ottawa, the British League of Montreal, the Ontario government and the Dominion government, and placed on farms where they were supposed to be paid \$20 a month minimum, and guaranteed continuous employment they state, the Telegram says.

They are without any official word from any government authority as to what is going to happen to them. "The Dominion Government Inspector, C. O. Mitchell said their cases were being considered by him and the Ontario Government authorities.

2723

(By Annabelle Worthington)

A charming addition to your Fall wardrobe is a transparent velvet printed in delicate purple tones, most admirably suited to all-day occasions. The Style No. 2723 sketched emphasizes the curved hips all Paris is talking about. The sleekly slender skirt, draped at right side, shows interesting ruffled movement.

The becoming open V-neckline is finished with rolled collar. Sleeves have darts below elbows to give slender appearance. Front shoulders are fitted and narrowed by inverted tucks.

The bodice is long-waisted to affect hip yoke. This makes it very simple for home seamstress, for after the tucks are stitched in shoulders, the back is joined to the two front sections. The two-piece skirt with cascade drapery on right side is seamed and stitched to bodice. It is now ready to sew collar at neckline and set sleeves into armholes.

About two hours of your time and you have a perfectly adorable dress that takes but 3 1/4 yards of 40-inch material with 1 1/2 yard of 32-inch contrasting to copy it exactly.

It comes in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

It is very attractive made of black crepe satin with rolled collar of egg-shell shade faille silk crepe. Silhouette in bottle green self-trimmed and feather-weight woolen in army blue in olive, piping pattern eye smart daytime selection.

For more formal wear, choose Lucerne blue transparent velvet.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

HELPING NEIGHBORS IN NEED

Golden Text: "Thou shalt love thy neighbor as thyself."—Leviticus 19:18.
Lesson: Matthew 25:31-46; Luke 10:35-37; James 1:27; 2:14-17.
Devotional Reading: Luke 6:27-36.

Explanations and Comments

Service For Others Is Service For Christ, verses 34-40.—To those on His right hand the Judge will say, "Come ye blessed of my Father, inherit the Kingdom prepared for you from the foundation of the world."

"The thought of God from the beginning looked towards those who by such conduct would inherit such reward."—R. H. Horton.

For I was hungry, and ye gave Me to eat: I was thirsty, and ye gave Me to drink; I was a stranger, and ye took Me in: I was naked, and ye clothed Me: I was sick, and ye visited Me: I was in prison, and ye came unto Me.

The righteous are sincerely humble, and they ask when it was that they saw the King in need and helped Him. "Wordsworth says: 'The King is homeless, unremembered acts of kindness and of love that are the best of men a good man's thought of the King is forgotten just because they were instinctive, but Jesus emphasized the point, they are decisive; they come from the heart. His telling phrases suggests, from 'the overflow of the heart,' and they reveal it."

The Fate of Those Who Fail To Serve Christ By Serving Others, verses 41-46.—To those on His left hand, the unrighteous, the King will say, "Depart from Me, ye cursed, into the eternal fire, which is prepared for the devil and his angels." The word here translated "Hell" is "Gehenna." Gehenna was a field outside the city walls of Jerusalem, in which the garbage and other refuse of the city was carried and burned.

"For I was hungry, and ye did not give Me to eat; I was thirsty, and ye gave Me no drink." "When?" they ask, and receive the answer, "Inasmuch as ye did it not unto one of these least, ye did it not unto Me." There are few things on which the New Testament is more severe in its condemnation than uselessness and self-centered living. The sin of doing nothing in a world of want and need is a sin that is pilloried and branded with the utmost condemnation of Christ.—Charles Brown.

How One Failed To Be a Good Samaritan.—"Master! I have this burden no law of the Ten—have hurt no one. Is it enough?"

"Child, there stood one by thy side burdened with heavy tasks of lowly, earthly labor. For a little while, a little easing of the burden, he looked to thee. Thou hadst time and strength."

"Master, I did not hear." "Thine ear was dull. There came a guest to seek thy converse, a human friend in quest of fellowship. I marked they sigh, thy frown. 'Why was thy heart not glad?'"

"I was reading. I hate to be disturbed, to be called from great thoughts to trifling talk."

"The children have these some few moments in their play. Without thee they went wrong—how far wrong thou wilt not know. It is too late."

"Child's play? But I was searching for a hidden truth of spiritual import."

"Thou didst not turn aside to lift that lame one who had fallen by the wayside."

"I was in haste to do what I had planned. I meant to help him when I should return."

"Another lifted him. Shall I question further?"—Unknown.

I never cut my neighbor's throat; My neighbor's gold I never stole; I never spoiled his house and land; But God have mercy on my soul! For I am haunted night and day By all the deeds I have not done; O unattemped loveliness! O costly valor never won!

—Marguerite Wilkinson.

Brilliant English Pantomime

Return Engagement Announced Of Great Pantomime Players In

Entirely New Franchise. Philip Rodway's brilliant English Pantomime company returns to the Grand Theatre, Regina, for three days, commencing Thursday, December 5th, and Walker Theatre, Winnipeg, for week commencing December 9th, in "Mother Goose," with an entire change of costumes, scenery, effects and subject matter. The company sailed triumphantly across Canada with "Humpty Dumpty," meeting with success that will hardly be equaled by any other production this season.

It returns with a great extravaganza that is regarded by many competent critics as better than "Humpty Dumpty," and in fact, as the finest of all English pantomimes.

Dan Leno, Jr., the famous eccentric comedian, as Mother Goose, and "Wee Georgie" Wood, the world-famous bow impersonator, as her son are a whole show in themselves in the part of the mime. Florence Hunter is again enjoying a prominent part, and of course, Fred Conquest as Priscilla, the Goose that lays the golden eggs, is his own inimitable self in a role that he seems to enjoy more than ever. Mr. Rodway's version of the fairy tale is written to allow of great deal of scenic variety, and the gorgeous effects introduced are beyond description. New costumes, new comedy, new songs, and dances are provided in abundance, and "Mother Goose" is certain to be another big success of the season.

Canada To Import

British West Indies Fruits

Fifteen Thousand Crates Of Oranges From Dominica To Come Next Year

"We expect to ship from ten to fifteen thousand crates of Dominica oranges into the Maritime and Montreal markets next year," declared Captain A. D. Robertson, of Dominica, B.W.I., who arrived at Saint John on the R.M.S. Lady Nelson, of the Canadian National Steamships, from the West Indies.

Captain Robertson, who took up the cultivation of oranges and grapefruit at Dominica as a hobby after the war, stated that there were excellent possibilities for the cultivation of citrus fruit on the island of Dominica, and he said that at the Manchester Exhibition, the Dominica oranges and grapefruit captured first place over the California product. Eighty per cent. of his product consists of Washington navel, all grafted on sour orange stock. A unique feature of the Dominica citrus fruit industry was that on his estate he discovered several trees of Valencia, which had no seeds. He visualized great possibilities for the industry, which, in his opinion should result in Canadians obtaining their oranges and grapefruit at a lower price.

The backwardness of the development of the citrus fruit industry in Dominica, Captain Robertson stated, was due to the lack of adequate steamship services, but with the advent of the Canadian National Steamships, the industry was bound to develop. He has associated with him in his enterprise, Mr. J. E. Knowlton, who accompanied him on his trip. The climate of Dominica, Captain Robertson declared, was delightful, with an average temperature of 75 degrees.

Captain Robertson was associated with the Germans during the war, serving on the Bulgarian and Western Fronts.

Naturalists Find Large Worms

Specimens Discovered In Australia Six Feet Long

Earthworms longer than a man and an inch in diameter are reported in the British scientific magazine "Nature" as the quarry of a naturalist's hunt in southeastern Australia. Average specimens range from four to six feet in length, and one nine feet long was observed by Charles Barrett, member of the expedition. An extreme length of eleven feet was reported though not seen on this expedition.

The worms make loud gurgling noises when they retire into their burrows on the approach of a possible enemy. Their greenish-translucent eggs have tough, horny shells, and are from two to three inches in length.

Applicant: "And if I take the job am I to get a raise in salary every year?"

Employer: "Yes, provided, of course, that your work is satisfactory."

Applicant: "Ah, I thought there was a catch in it somewhere!"

WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandas, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold, rain, crack, or drip,—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 130 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

Increase In Life Insurance

\$650 In Insurance For Every Man, Woman and Child In the Dominion

The total amount of life insurance carried by the people of Canada is at present about \$6,500,000,000 or approximately \$650 for every man, woman and child in the Dominion. The United States with \$750 per head of population is the only country in the world that exceeds Canada in the amount of life insurance carried.

The number of life insurance policies in force in Canada is 7,000,000 in round figures, or about three for every family in the Dominion. An encouraging fact about life insurance in Canada is that no one has ever lost a cent as a result of the failure of a Canadian life insurance company, which is principally due to the supervision of the Canadian Government Department of Insurance over the companies for the protection of policy holders.

Over \$300,000,000 is paid annually by the people to Canada in life insurance premiums. In the past 10 years the number of policies carried has doubled and the assets of the Canadian life insurance companies is placed at \$1,205,000,000.

A new and hitherto unknown route across the Rocky Mountains has been discovered through a pass into British Columbia over the western boundary of Jasper Park, Alberta.

Peanuts are used in the manufacture of several varieties of wood stains.

The Singing Fool
BY HUBERT AIL
Copyright, 1928, Warner Bros.
Pictures, Inc.

SYNOPSIS
Al Stone, singing waiter at Blackie Joe's New York night club, is loved by Grace Farrell, the cigarette girl, but he doesn't know it. He marries Molly Winton, a ballad singer, and wins fame as a composer of popular songs. When their baby, Junior, is about two years old, Molly elopes with John Perry, Al's best friend. She and Perry take the child Al adores and sail for France. Al, completely broken by his loss, disappears from Broadway and becomes a derelict. One day the sight of Grace Farrell on the street arouses old memories. He returns to Blackie Joe's at night, talking to Blackie in his office until Blackie is called outside by a patron.

CHAPTER XXIV

Blackie crossed the main room briskly to shake hands with the departing patrons and urge them to come again. But as he talked his mind was working on Al's problem. Suddenly he reached the conclusion that Grace Farrell was the logical one to approach Al. She might reach his hidden nature and revive his courage when no one else could.

Grace worked at a desk in an alcove on the other side of the main room. A screen concealed her view of the room and she had not seen Al and Blackie cross the floor. Now she had just completed her accounts for the day. She was decidedly sleepy, but her eyes opened wide when Blackie stood before her. From his expression she realized that something important had happened.

"Guess who's here?"

"Who—Blackie? 'Not—not Al?"

"The same. Just wandered in a few minutes ago—looks as if he's been sleeping on the wharves for a month."

Grace's hand darted to her cheek and pressed hard against it. So, it had happened, the thing she had dreamed of and worked so hard to bring about. Al was found!

"Listen, gracie," Blackie leaned forward confidentially. "He's in my office. I've talked to him, tried to make him stage a come-back, but I can't make a dent. He just shakes his head. Now you try. Treat him rough, bowl him out, if you think it'll work."

Grace rose. She was listening, concentrating, planning. Every life has at least one big moment—'t's was to be hers! The soul and future of a talented, lovable man was at stake! As she planned she prepared for the big moment in a feminine way—patting her hair into shape, rearranging a stray curl, examining her

Illness Kept Her From Work

"I took Lydia E. Pinkham's Vegetable Compound because I was so sick every month that I had to keep my bed for two days and I suffered so that I felt badly all the time. I had been working in a factory but for a long time was not able to work as I was so run-down and nervous. My friends told me of the Vegetable Compound. I am now sound and well and have gone back to work. I have a good appetite, my color is good and I am in good spirits."—Evelyn Bourque, 132 Alma Street, Moncton, New Brunswick.

and Calgary, Ontario, Canada.

lips in a mirror. Then she turned determinedly toward the private office. Blackie stood in the main room, staring after Grace as she walked toward the office. He decided to stay away from Al for a few moments and let Grace work alone.

Meanwhile, Al had been growing restless. After he looked about Blackie's office for a while, carefully studying the familiar pictures on the wall, his nervous tension made him want to jump up and leave. But as he stood up, determined to walk out, he saw Blackie's old piano in a corner of the room, behind the desk.

He walked slowly toward it. Yes, it was the same old battered instrument. He had composed some of his early hits while sitting in front of it. Without thinking, he ran his hands lightly up and down the keys. What fingers! They were stiff, grimy, but so, so sure. Their play across the keys was painful and slow, yet in the old days they had danced up and down the scale in nimble ease. . . .

Al looked up, hearing a faint sound, and turned his head. Grace stood in the doorway. Grace had entered as quietly as possible; she wanted to study him before he saw her, for she knew that in that flash second her intuition might give her a clue as to the best way to proceed with him. Now, as he stared up at her with startled eyes, his really pitiable condition was accurately revealed. She answered his stare with an expression of tender sympathy.

"Al?" she whispered softly.

"Grace! Why, it's really you!"

For a moment she thought he would cry. He seized her hand in both his and gazed steadily down into her eyes. His grip was so hard that it numbed her fingers; she felt he was literally clinging to her to save himself from breaking down. All the force of her deep maternal spirit was directed toward him; she longed to take him in her arms and comfort him.

"You've changed a lot!" he exclaimed in astonishment.

Grace refrained from saying he had changed too.

"Have I?" she questioned brightly. "You've grown older, for one thing."

"You're much more beautiful than you were," he continued earnestly. "And you were always a winner."

Again Grace smiled, and deftly turned the conversation. "How have you been, Al?"

He glanced down at the frayed cuffs of his coat sleeves. "Judge for yourself," he grinned ruefully. "But, Al, you don't have to look like that. You have money."

"Yes, but I don't want it—I don't use it."

Grace waited a moment. She had the faintest sense of the passive barrier of despair between Al and her that Blackie had felt. Yet there must be a way to cross that barrier! She said firmly:

"Blackie tells me you mean to stage a come-back."

Al shook his head. "Blackie's wrong." But as he said that the young song writer glanced away; he was ashamed to face Grace. Quick as a flash Grace saw the move and thought: "If he isn't past shame, there's hope."

"Listen, Al," she said. "You have the gift of song. Millions of people are made happy by the things you write. Do you think you have any right to crush that gift and turn your back on all those people?"

"That's just preaching, Grace. A man in my situation has a right to live the way he pleases, providing he doesn't hurt any one. I don't hurt anybody."

"Yes, you do."

Al shot an astonished, questioning look at Grace.

"You hurt me, for one person," she said gravely. "Of course that doesn't matter. But you hurt someone else—hurt him terribly. You hurt your son, whom you love. What will he think when he grows up and learns that his father drifted downward, allowing himself to become an utter failure?"

Grace's voice had risen to a passionate ring as she concluded. It was a terrible ordeal for her to talk in this accusatory way to Al, but his case needed it. Blackie had said, "Treat him rough." Grace saw that only drastic treatment would arouse him.

Al winced visibly and reached toward the piano for support. He couldn't believe his ears—gentle Grace talking to him this way! Her eyes were like steel.

"Junior will never know about me," he answered defiantly. "No one will tell him. He'll grow up believing I disappeared and died in some unknown place. That is what is going to happen to me. He'll never see me as you see me now—a failure!"

Then Grace played her strongest card. "Yes, he will know about you," she said, with blazing eyes. "I'll see to it that he does know! I'll tell him!"

"You'll—what?" Al's mouth

The Breathable Talc
Peps
COUGHS-COLDS & BRONCHITIS

dropped in wonder; anger began to gather in his eyes. "I'll tell him—everything about you! How you look at this moment, how you fan away from everybody who wanted to help you, how you became content to drift downward to the dreary life. I'll see that he knows everything about you, Al Stone! Don't forget it!"

Al believed Grace meant what she said. He staggered for a moment, then crouched and began moving toward her, a hateful look in his eyes. Grace saw his finger twitching, eager to get at her throat, but she did not give an inch as he approached.

"If you do that," he whispered with deadly softness, "I'll kill you!" (To Be Continued.)

French Museum Gets Cedar Grizzly Bear

Primitive Work Of B.C. Indians To Find Place In Old World Collection

A grizzly bear carved out of a tree, a piece of primitive but significant Canadian art, is now on its way to Paris, to be studied and admired. The grizzly bear of Niskiwat, telling in its nine figures with wide staring eyes and grinning mouths, a strange and thrilling tribal story, is the gift of the Canadian National Railways to the Trocadero Museum. It will be given as a place of honor in the ethnological section of the museum; in the hall devoted to the Indians of North America. This hall is being reconstructed by Paul Coze, French painter and expert in Indian art and customs. Mr. Coze spent part of last summer at Kwangwa and Hazelton, B.C., where the best of Canada's totem poles stand in their native setting.

T. B. Campbell, Canadian National Railway engineer, who has for several years been engaged in the work of restoring and preserving totem poles in the Skeena River Valley and along the coast of British Columbia, procured the grizzly and arranged for its shipment to France. The pole stands twenty feet tall.

Growth Of Airplane Express Service Rapid

Great Advance Made Since Starting Ten Years Ago

It was in August, 1919, that the world's first aeroplane express service was started by British enterprise between London and Paris. The pilot was Captain E. H. Lawford, a famous pioneer aviator, and the machine was a biplane of 360 h.p., carrying only two passengers. Today one of the London-Paris liners of Imperial Airways develops more than 1,000 h.p., carries 20 passengers, besides pilot, engineer, and steward. At the end of 1919 there were only about 3,000 miles of organized air lines throughout Europe. Today the figure stands at 50,000 miles, while throughout the world there are 90,000 miles.

Asthma Overcome. The triumph over asthma has assuredly come. Dr. J. D. Kellogg's Asthma Remedy has proved the most positive blessing the victim of asthmatic attacks has ever known. Letters received from thousands who have tried it form a testimonial which leaves no room for doubt that here is a real remedy. Get it today from your dealer.

Some Interesting Inventions
Inventions of a domestic nature won the greatest interest at the recent Exhibition of Inventions in London. A hook and eye which is easily and quickly attached to material without sewing, patented by a woman, was shown. A device for preventing the contents of a sump from boiling over, and the apparatus for starting a fire downstairs by pulling a cord in the bedroom, also attracted much attention.

The violin has remained virtually unchanged in shape or substance for 300 years.

MINARD'S
"KING OF PAIN"
LINIMENT

Nature Has Gas Plant
Remarkable Specimen Of "Burning Bush" Grows In London's Kew Gardens

When one speaks of a "gas plant" one naturally thinks of coals and gas meters. Nature however provides a real gas plant, specimens of which are to be found blooming in London's Kew Gardens. It is otherwise known as the Dittamoras or "Burning Bush." When a lighted match is applied to a shoot of it there comes a brilliant scarlet flame. Like a flash of lightning it travels up the length of the flowering shoot, without injuring it. The best time to make the experiment is when the flowers are fading. The inflammability of the plant is due to this: that on its stalks are minute red-brown glands, and these secrete an etheric oil. The glands develop fully soon after the blossom begins to fade, but they shrivel up when the fruit begins to form. Luminous plants not unlike this have been a source of strange legends in India and Afghanistan. There is a manuscript called Sufed Koli in Afghanistan on which the natives believe that gold and silver exist. In springtime the slopes are covered with bushes which at night from a distance seem to be on fire, yet when you are close to them there is no sign of flame. The "burning bush" of Kew is a handsome plant about three feet high, with pink flowers and leaves much like those of the ash tree.

A Miniature Writer

German Living In United States Acquires Style Few Can Imitate

Hugo Relechner, a German living in the United States, has acquired a style of writing which few can imitate. He conceived the idea of miniature writing while sending Christmas greetings to his customers. He made an effort to see how many words he could write on a common postal card; his first attempt needed 10,000 words and he increased that to double on the next attempt. He has written the Constitution of the United States, the Declaration of Independence, the text of the Democratic platform and that of the Republican party, ex-President Coolidge's Memorial day addresses given at the National cemetery and Gettysburg. Armistice day addresses given at Kansas City, November 11, 1922, and many other important documents all in miniature so small that at a distance the paper looks blurred. The book that contains the Gospel according to St. Matthew, from the genealogy of Jesus to the final interview and commission, has thirty-seven pages, each page two inches long and one and one-half inches wide, and has a total of 23,271 words. The original book contained thirty-four pages, seven inches long and four and one-half inches wide.

Miller's Worm Powders will not only expel worms from the system but will induce healthful conditions of the system under which worms can no longer thrive. Worms keep a child in a continual state of restlessness and pain, and there can be no comfort for the little one until the cause of suffering be removed, which can be accomplished by the use of these powders, which are very effective.

Canada's Development

British Paper Sees Canada As Coming Centre Of The Empire

Not so long ago a prominent statesman prophesied that before the end of the present century the British Empire would find its centre of gravity in Canada, and that this great land would be maintaining a population as large as that of the United States. There is nothing inherently improbable in either surmise, for while these little islands have apparently reached saturation point in the matter of population, Canada has vast spaces eminently fitted to become the homes of men and women of our race. Moreover, encouragement is to be derived from the fact that Canada has preserved a magnificent loyalty to the Motherland, and has, in addition, resolutely encouraged the free play of individual enterprise in her economic structure, with the result that the way is open to illimitable industrial and commercial development.

Minard's Liniment for Chapped hands.

"So you got a big fine for smashing up someone's car? I thought you said you had a friend in court who would fix things up for you?" "Just my luck. He was the fellow I ran into."

"Teacher—We can't take things that are unlike from each other—for instance, you can't take three cakes from four sheep."

Farmer's Son—But you can take three gallons of milk from four cows.

Film companies in the United States carry on their permanent payrolls more than 325,000 employees.

Soviets Pass Drastic Law

Russians Refusing To Return To Country On Call Are Declared Outlaws

Hereafter Soviet Citizens working or residing abroad who may refuse to obey the summons of their government to return to Russia will be adjudged guilty of treason. When finally taken into custody they will be sent to prison and shot within 24 hours after identity is established.

This drastic measure was taken by the central executive committee of the Soviet Union in the light of the recent refusal of M. Bessodovsky, of the Soviet embassy at Paris, to return to Moscow to face trial on charges of embezzlement.

The new decree is retroactive and declares that all such Soviet citizens will be charged as outlaws and deserters, and as enemies of the workers and peasants. All their property will be confiscated and their cases tried by the supreme court of the union and their names broadcast as outlaws.

KEEP THEM HAPPY BY KEEPING THEM WELL

It is natural for children to be happy, active and full of fun. When they are fretful, fussy and disinclined to play you may be sure something is wrong. Almost invariably that something lies in the digestive tract.

It is to meet the need for an absolutely safe corrective of childhood ailments that Baby's Own Tablets have been designed. They gently regulate the stomach and bowels and thus drive out constipation and indigestion; break up colds and simple fevers and allay teething pains. Concerning them Mrs. W. E. Forsyth, Dover, N.B., writes—"I would not be without Baby's Own Tablets as I know of nothing to equal them for fretful, fussy babies who are troubled with colds or sour stomach."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Made Successful Flight

Windmill Plane Remarkably Steady Even In Strong Wind

An airplane fitted with four windmill planes, which revolve, recently made a tour of Europe, and landed at Lympne, England. Although there was a fairly strong wind, it was remarkably steady in its flight. The craft was piloted by M. Elton, of Paris. When flying over Lympne, it circled several times, and eventually came straight down from a height of several hundred feet, making a perfect landing.

Minard's Liniment for Coughs.

No News To Him

One unpleasant consequence of the swelled head is the cold shoulder. G. K. Chesterton is fond of telling this story against himself. He once sent his secretary to protest against the noise made by a factory near his house. "Mr. Chesterton can't write," said the secretary. "I know he can't," agreed the manager. "I've always said so."

A journey to Berlin from London by land and water takes twenty hours; by air it takes only nine and three-fourths.

Chest Colds
Need Direct Treatment
It is an obstinate cold indeed that can resist the direct double action of Vicks. Rubbed on the chest, it acts 2 ways at once:

- (1) Direct to air passages with its healing vapors released by body heat;
- (2) Direct, like a poultice, it "draws out" the soreness.

acts 2 ways at once

Keep Foods Deliciously Fresh
Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sani Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh, delicious! Para-Sani keeps them from staling. Get Para-Sani in the handy, sanitary knife-edged carton. For less exacting uses ask for Appleford's "Centre Pull" Packs in sheet form.

Joe Kelly Draws a Life Sentence in Detroit City

Joseph Kelly, alias Joseph Ryan, alias Theodore Douglas, wanted in this province for robberies of stores at Cessford and Chinook and also for escaping from the Youngstown lock-up where he was awaiting trial, will not return to Alberta to face these charges. He has been sentenced to life imprisonment at Detroit for robbery while armed.—Calgary Herald.

Heard About Town

The Ladies' Aid will meet on Wednesday, Dec. 11th, at the home of Mrs. Clarence Peterson.

Mrs. Berten Bjorsvik, of Colliholme, visited her parents, Mr. and Mrs. A. E. Roberts, for a few days last week.

Don't forget the dance which will be held in the Chinook School on Friday, Dec. 6th. Proceeds will go towards the school Xmas tree. Everyone welcome.

News in Brief

The Philadelphia Athletics have averaged an attendance of 15,000 a day all season, and that without Sunday baseball crowds.

A congress is planned in Turkey for the near future to organize sports throughout the length and breadth of the Republic.

Gene Tunney, retired heavyweight champion, earned \$1,715.836 since his first bout with Jack Dempsey in September, 1926.

The best season's average by a big league pitcher is .872, set by Joe Wood, of the Red Sox, in 1912, when he won 34 games and lost five.

Many residents, Ozuoluama, Mexico, are dying because of lack of medical attention. The city, with a population of 40,000, is without a doctor.

Colliholme Happenings

We are glad to announce Mrs. McDowell is improving after a severe attack of laryngitis.

The special meetings held at Colliholme Nazarene Church by Rev. Thos. Bell are being continued every night except Saturday of this week. The roads are fairly well opened for cars and the weather good. Those attending are enjoying these fine services. Everybody welcome.

Heard About Town

Miss Caro Domanowski left on Monday morning for Olds, where she expects to spend the winter.

Owing to the slippery condition of the roads Rev. J. D. Woollatt was unable to motor from Cereal on Sunday afternoon, consequently there were no services. There was a fair attendance and A. V. Brodine held a short service.

The Ladies' Card Club met Tuesday evening at the home of Mrs. M. L. Chapman. Mrs. J. Massey held the highest score of the evening winning a pair of dainty linen hand embroidered pillow cases. Next meeting at Miss W. A. Hurley's.

A pleasant evening was spent at the home of Mr. and Mrs. F. B. Knibbs Wednesday evening, when they entertained the Chummy Circle and gentlemen friends. A program given by Mrs. F. Bassett, Mrs. C. Peters, Mrs. L. Cooley, and Mrs. F. B. Knibbs, also cards were enjoyed during the evening. The winners of cards were: Miss Bayley, and R. Massey, and consolation, Miss Vice and Wm. Hughes.

Sunshine Needs Aid**In Relieving Distress**

An organization which is working 12 months in the year, and particularly during the cold weather months, to help those in distress is the Calgary Herald Sunshine Santa Claus Fund. Every year at this time an appeal is made to contribute to the fund, and assistance is sought, not only in the City of Calgary, but throughout the province, for the reason that the Sunshine Society helps to relieve suffering in various parts of Alberta, as well as in the City of Calgary. Sunshine has been functioning for 18 years and in that period has relieved the distress of thousands.

It is a good thing for Alberta that such an organization exists because there are many cases which cannot be assisted through official sources and yet, if the position where their lives are cases are not helped, the suffering would be intense.

Those who are in the happy tie common necessities of life

J. G. CONNELL, Manager**CHINOOK****Mid-Winter Golf Tourney at Victoria, B.C.**

These photographs were taken on the beautiful Colwood Golf Course, Victoria, B.C., where the first Empress Hotel mid-winter golf tournament for the E. W. Beatty challenge trophy, will be held during the week of February 18 & 19. These pictures, taken on the 21st of January, give some idea of the summary aspect of Victoria's mid-winter weather. The hard-wood foliage is shed in the fall and elsewhere, but there is a wealth of evergreen at Victoria to make the fairways attractive and at no time during the winter is there sufficient moisture to spoil a round or to ruin the greens if played over.
